Summary

A highly skilled Full Stack Senior Developer with over 10 years of experience in developing web applications and microservices for AWS, Google Cloud Platform, and Azure. Expert in Angular and proficient in back-end technologies including Node.js, TypeScript, C# .NET, and Database technology including SQL and noSql solutions. Demonstrates a strong ability to design, develop, and deploy scalable and efficient solutions across various platforms.

Skills

Frontend:

- TypeScript, JavaScript
- Angular (2-18), NgRx, RxJS
- Angular Material, PrimeNG, AG Grid

Backend:

- Node.js (TypeScript/JavaScript), C# .NET
- SendGrid, Okta, Adobe Acrobat Sign

Platforms/Environments:

- AWS (including Lambdas and CDK)
- Azure
- Google Cloud

Database:

- Azure SQL Server, DynamoDB, MongoDB, Firebase

Build Tools/Team Solutions:

- Git, Jira, Teams, Azure DevOps, AWS CDK

Industry Focus:

- Healthcare, Voting Technologies, Telecommunications

Experience

Principal Developer - Contractor

LIDO.IO

Mar 2023 – June 2024

- Took over implementation of a system for managing pharmaceutical clinical trials, achieving beta user deployment.
- Upgraded codebase from Angular 6 to Angular 17 and .NET 2.2 to .NET 8.0.
- Implemented CI/CD pipeline with multiple environments (Dev, Staging, Prod).
- Identified the need for an admin portal and successfully launched it.
- Tech used: Typescript, Angular v7-v18, PrimeNG, Rxjs, Okta, Jasmine, Karma, C# Dotnet, Azure SQL, Entity Framework, PDF Sharp, Azure Devops

Principal Developer - Contractor

Symplr Healthcare

August 2022 – Mar 2023

- Led a development team in converting an Ionic 3 app to Angular 12.
- Participated in scrum sessions.
- Actively participated in implementation tasks.
- Mentored and reviewed team members.
- Tech used: Typescript, Ionic 3, Angular 12, SQL Server

Developer

DemocracyLive

January 2021 – August 2022

- Contributed to voter and admin-facing software implemented in Angular 8-13.
- Developed a new system for email campaigns optimized for high throughput and deliverability using the SendGrid API, DynamoDB, AWS Lambdas, and CDK.
- Developed a C# .NET API for an Electron app.
- Tech used: Typescript, Angular 8-13, PrimeNG, NgRx, Rxjs, nx, AWS Devops, AWS Lambdas, NodeJS with Typescript, SendGrid, DynamoDB, C# Dotnet

Frontend Developer

Contractor for Microsoft

November 2019 – December 2021

- Modified and maintained the Service 360 UI in Angular 5 and AngularJS.
- Worked as a frontend developer on Network Extensions for Azure Portal.
- Tech used: Angular 5, AG Grid, JavaScript testing scripts

Lead Full Stack/Frontend Developer

IndustryLinq

Sept 2018 – November 2019

- Developed responsive full stack applications for mobile and desktop using Angular 5-8.
- Developed Google Cloud microservices and created Firebase DB architecture.
- Implemented role-based authentication on both the front end and back end using Google Cloud Admin SDK.
- Tech used: Typescript, Angular 5-8, Ionic 3, Nodejs, Google cloud microservices, Firebase DB, Firebase Role based Authentication

Senior UI / Angular Developer

Checkmate Systems

Sept 2017 – Sept 2018

- Worked on both customer-facing and back-office web applications.
- Designed HTTP services consuming RESTful APIs from a MongoDB NoSQL database.
- Implemented Angular 2-8 UI routing, navigation, and components.
- Tech used: Typescript, Angular 2-8

JavaScript / Web App Developer

Freelance

June 2016 – Sept 2017

- Worked on jQuery and Angular projects as a frontend developer.
- Developed a full stack MEAN application, including backend and MongoDB components.
- Created several small applications using jQuery, launching them on AWS.
- Designed and built multiple WordPress sites for clients.

Owner/Founder

San Sebastian Engineering

Oct 1997 – Jan 2005

- Produced stand alone UX and Database applications for horse show management
- Software developed in C++ and Access

SDET/SDE

Microsoft

April 1989 – May 1995

- Participated in producing and shipping enterprise scale networking software
- Designed and developed tests for systems development in C++.
- Worked in build systems for replicating and producing production software.

Lead Developer

ARCO

May 1986 – Mar 1989

- Led team of 7 developers to rewrite POS software for AM/PM mini markets
- Rolled out software to 55 stores

SDE

University of Southern California

September 1985 – April 1986

- Designed and developed testing software
